

# INDUSTRIES SERVED

At Mitronix, we specialize in high-quality lighting components, including non-shunted fluorescent light sockets and lamp holders suited for a broad range of industries. The following guide dives into a few of the various industries & applications that utilize our lighting products to suit their unique lighting needs.

## OUTDOOR LIGHTING

### FLOODLIGHTS

Motion-sensor floodlights discourage unwelcome individuals from trespassing on the property, and they can also facilitate parking after sunset.

### PATH LIGHTS

Outdoor lights placed along walkways improve visibility and help prevent falls—thereby protecting guests while also reducing the owner's liability risk.

### ENTRYWAY LIGHTING

To avoid fumbling for keys in the dark, hang lighting around the entryway.

### DECORATIVE LANDSCAPING LIGHTING

Outdoor lighting can also be used to highlight your home and landscaping, making the property more aesthetically pleasing.

## POOL AND SPA LIGHTING

Underwater lighting can be installed in pools and spas to illuminate the water, which makes it safer for swimming and walking around the property.

These lights also create a charming atmosphere and increase the likelihood that people will use outdoor amenities after dark.

## COMMERCIAL/RETAIL LIGHTING

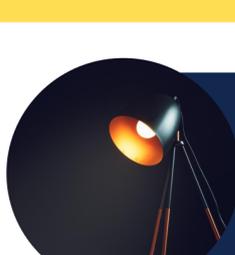

### AMBIENT/GENERAL LIGHTING

Ambient lighting fixtures are the main source of illumination in a room.

### TASK LIGHTING

Task lighting supplements ambient lighting to add focus to a particular area where people will perform detailed activities.

### ACCENT LIGHTING

Accent lighting is meant to draw the viewer's eye to an area of special interest—for example, a section for newly released merchandise.

### DECORATIVE LIGHTING

Reinforces the company's brand image and adds visual interest. Usually highly stylized and focal point in a room.

## STAGE AND THEATER LIGHTING

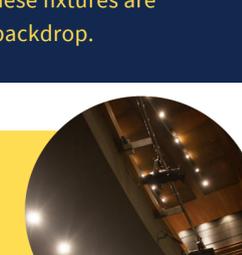

### ASYMMETRIC FLOOD LIGHTS

Sometimes called cyclorama lights, these fixtures are used to illuminate the scenery backdrop.

### FLOOD LIGHTS

Flood lights provide uniform coverage across the stage.

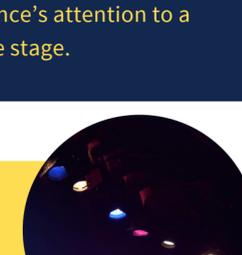

### SPOTLIGHTS

Spotlights are used to draw the audience's attention to a performer or section of the stage.

### BEAM LIGHTS

Beam lights create a narrow focus of light on the stage.

## RESIDENTIAL LIGHTING

- Just like business owners, homeowners benefit most from having multiple light sources in every room.
- Lamps, overhead track lighting, chandeliers, pendant lights, and wall sconces are some of the most popular forms of residential lighting.
- Task lighting can be especially important in the kitchen because cabinetry and wall-mounted appliances block some of the overhead lighting from reaching the counters.

### Contact Mitronix for Your Lighting & Lamp Holder Needs Today

Lighting is critical to your comfort and safety, and it also has a significant impact on a business' property value, accident liability, and customer experience. The dedicated and knowledgeable Mitronix staff has the expertise and product range needed to provide solutions for all your lighting needs, both residential and commercial.
